

MSIN616 Homework 1

Behavioral Objective

❖ Review Inner Joins and Outer Joins

We have already loaded on AdventureWorks together in class.
If you have not already, follow these instructions on Azure labs :
Install AdventureWorks on MSSMS

Download AdventureWorks2014 from the Microsoft website.

In the C:\ drive create a Temp folder.

So C:\Temp

Go to Microsoft SQL Server Management Studio

Right click on databases on the left side

Select RESTORE DATABASE

click File and select the three ellipses on the same line "..."

Navigate to C:\Temp

Select AdventureWorks2014

Click OK or Apply all the way through

You should see it install

To see the database go back to the left folder

Right click of Databases and click REFRESH.

You will see your AdventureWorks database there.

Part A:

In SSMS, write a query to provide the information requested below

1. list the complete address of each address that is in the United States (Country)
2. list the salesorderid of sales that ordered **BOTH** productid 776 and productid 777.
construct this query using **two different** techniques
3. for each salesorder, display the salesorderid , total due and the name of the currency used to pay for the order
4. display the name of each product that can be found in inventory at **both** locations 1 and location 6. Construct this query using **two different** techniques

5. list the names of products were never put on sale
6. list the first name and last name of each Employee and the PayRate he/she earned and the date the rate was applied. Sort the data by ID and date the rate was modified
7. List the name of each product and the name of the Vendor that supplies the Product
8. List the names of Persons for which we have no CreditCard currently on file

Part B:

Based on the data in the AdventureWorks database

1. Provide one question that can be addressed with an inner join. Write the query to answer this question
2. Provide two questions that can be address with an outer join. Write the queries to answer these questions
